ENAIRe 

Fundamentals
and Planning of
AIR NAVIGATION
SERVICES SPECIALIST

COURSE

THREE MONTHS PROGRAMME

TRAINAIR
PLUS

INTRODUCTION

ENAIRE, one of Europe's leading air navigation service providers offers this unique training package for aviation professionals to enhance their expertise with the **Fundamentals and Planning of Air Navigation Services Specialist**, accredited by the ICAO TRAINAIR PLUS Programme.

ENAIRE **has been awarded** by the International **Civil Aviation Organization (ICAO)** in recognition of its contribution to the development of aviation professionals worldwide.

COURSE HIGHLIGHTS

Target Audience: Aimed primarily at Air Navigation Service (ANS) staff, airlines, airport managers, regulators, military authorities, meteorology providers, industry professionals and consultants.

Comprehensive Training: Acquire technical knowledge, strategic vision, and analytical skills to navigate the challenges of the evolving air navigation services sector.

Expert Instructors: Learn from a highly qualified team of industry experts and university instructors who bring their experience and knowledge to provide a current and comprehensive approach to all components of ANS.

LEARNING OBJECTIVES

- Identify ANS requirements demanded by air transport users.
- Explain the interaction between different ANS components, including technical and human resources.
- Characterize the air navigation institutional environment, functions, roles, and responsibilities.
- Understand the legal framework applicable to air navigation services globally and regionally.
- Describe technical and institutional measures to improve ANS and cope with existing challenges.

COURSE STRUCTURE

- 1 Fundamentals of Air Transport
