

ENAIRe announces job openings in engineering and IT

- The openings include positions for technicians in engineering, systems and facilities and IT system projects
- Reserve candidates will be accepted to cover future staffing needs in Central Services and in our regional offices

14 April 2021

The state-owned business entity ENAIRe, the national air navigation service provider, announces that it will be administering external selection tests for contract staff to select reserve candidates to cover future hiring needs for permanent and/or temporary employees in the fields of engineering and IT.

The vacancies are in level A (engineering-Master's) and level B (technical engineering-Bachelor's) for technical positions in engineering, air navigation systems and facilities, and IT system projects.

Reserve candidates will be accepted for all these positions at each of our five regional ENAIRe offices (Centre-North, East, South, Canary Islands, Balearic Islands) and at Central Services.

As a result of the selection process, candidates will be accepted for the following lists:

- Centre list for fixed and temporary positions, which will contain the list of suitable candidates for a specific job opening and work centre.
- National list for fixed and temporary positions, which will contain the list of suitable candidates for a job opening, regardless of the work centre.

Publication and requirements

This announcement and all its requirements are available on the ENAIRe [website](#) in the "Recruitment Processes" section, where all the information associated with the selection process will be published.

Applications may be submitted from midnight (CET) today until 23:59 (CET) on 30 April 2021.

The tests will be administered in Barcelona, Madrid, Seville, Las Palmas (Gran Canaria) and Palma (Mallorca).

Applications can only be submitted through the ENAIRe website.

About ENAIRe

ENAIRe is the air navigation service provider in Spain.

As a company of the Ministry of Transport, Mobility and the Urban Agenda, it provides en route control services for all flights and overflights from five control centres in Madrid, Barcelona, Seville, Gran Canaria and Palma, as well as approach services to every airport in the country.

In addition, 45 control towers receive ENAIRe's communication, navigation and surveillance services, and 21 airports, including the country's busiest, rely on its aerodrome control services.

ENAIRe is the fourth most important European air navigation service provider, and, in a clear commitment to the Single Sky initiative, belongs to international partnerships such as SESAR Joint Undertaking, SESAR Deployment Manager, A6 Alliance, ITEC, CANSO and ICAO.

ENAIRe is the official provider of aeronautical information in Spain
